Investor Pitch — Dashcomigo

The One-Liner

Dashcomigo is the financial operating system for Brazilian MEIs — combining Open Finance, investment tracking, and intelligent reporting into a single platform accessible to every entrepreneur.

1. The Problem

Brazil has **15.4 million registered MEIs** (Microempreendedores Individuais) — the fastest-growing entrepreneurial segment in the country.

Yet the vast majority of them manage their finances through:

- WhatsApp messages to themselves
- Manual spreadsheets that are never up to date
- A mix of personal and business accounts they can never fully separate
- Gut feeling when making financial decisions

The result is devastating:

- **60% of small businesses fail within 5 years**
- Financial disorganization is the #1 cited cause
- Entrepreneurs have no visibility into their real cash position
- Investment portfolios sit scattered across multiple apps, untracked

The core problem: Brazilian entrepreneurs lack access to the financial visibility tools that large companies take for granted.

2. The Solution

Dashcomigo connects to a user's bank accounts via Open Finance, automatically imports every transaction, tracks their investment portfolio in real time, and delivers the financial clarity they need — in a dashboard built for someone with no finance background.

No manual entry. No spreadsheets. No confusion.

3. The Product

Dashcomigo is a web-based SaaS platform with the following core modules:

Module	What It Does
Dashboard	Real-time financial overview with alerts
Cash Flow	Automatic transaction import and classification
Payables	Track bills and obligations
Receivables	Track client payments
Investments	Real portfolio imported from banks via Open Finance
Reports	Advanced P&L, cash flow forecast, investment analysis
MEI Tax	DAS tracking and reminders

Technology Edge:

- Built on **Brazil's Open Finance infrastructure** (Pluggy — 200+ institutions)
- Real-time data sync every 6 hours automatically
- Automatic classification of personal vs. business expenses
- Investment tracking with CDI benchmark comparison

4. Why Now

Three forces are converging to make this the right moment:

Open Finance Maturity

Brazil's Open Finance regulation, mandated by the Central Bank, went fully live in 2023. As of 2025, **40M+ consents** have been shared. The infrastructure is proven, trusted by consumers, and ready to be leveraged.

MEI Market Explosion

The number of registered MEIs grew **18% year-over-year** in 2024. This is the fastest-growing entrepreneurial segment in Latin America — and they are chronically underserved by financial technology.

AI & Automation Cost Curve

The cost of building intelligent financial features — prediction, classification, recommendation — has dropped dramatically. What required an enterprise-scale team 3 years ago can now be built by a small startup.

5. Differentiation

What Makes Dashcomigo Unique

- 1. Built specifically for MEIs** Not a generic finance app. Every feature, every UX decision, every pricing tier is designed around the reality of a solo entrepreneur in Brazil.
 - 2. Open Finance as core infrastructure** Competitors offer manual data entry or basic bank sync. Dashcomigo uses Open Finance as the foundation — making the platform automatic, accurate, and complete.
 - 3. Investments + Operations in one platform** No other affordable tool combines business cash flow management with real investment portfolio tracking. Dashcomigo does both.
 - 4. Price accessible to the market** At R\$49/month, Dashcomigo is 4–8x cheaper than enterprise alternatives — while offering features those tools don't even have (Open Finance, investment tracking).
 - 5. Network effects potential** As more MEIs connect their accounts, platform intelligence improves — better classification models, better benchmarks, better recommendations.
-

6. The Market

Total Addressable Market (TAM)

- 15.4 million MEIs in Brazil
- 21 million small businesses (ME, EPP) in total
- Combined financial management software spend: **R\$4.2 billion/year** (estimated)

Serviceable Addressable Market (SAM)

- MEIs + small businesses actively using digital financial tools: ~3 million
- At R\$49/month average: **R\$1.76 billion/year**

Serviceable Obtainable Market (SOM) — 5-Year Target

- 10,000 paid subscribers = **R\$5.9 million ARR**
- Achievable with 0.07% of the digitally active MEI population

Market Tailwinds

- Open Finance adoption growing 40% year-over-year
- MEI formalization increasing
- Brazilian fintech ecosystem maturing rapidly

- Government pushing digital financial inclusion

7. Business Model

Primary Revenue: SaaS Subscriptions

- Free plan (acquisition) → PRO at R\$49/month
- Target LTV: R\$588 | Target CAC: R\$100 | LTV/CAC: >5x

Future Revenue: Financial Product Marketplace

- Credit referrals, investment distribution, insurance
- Commission-based, high-margin
- Projected to represent 25% of revenue by 2028

B2B Channel

- White-label API for accountants and financial advisors
- R\$299–999/month per B2B account

8. Traction & Status

-  Platform live and operational
-  Open Finance integration working (Pluggy, 200+ institutions)
-  Real investment portfolio import functional
-  Full reporting suite with investment analysis
-  PRO subscription plan active
-  Currently in beta testing phase
-  First paying users onboarding

9. The Team

Leonardo Teixeira — Founder & CEO

- Background in financial markets and investment management (Alto Valor Investimentos)
- Deep understanding of the MEI market and their financial pain points
- Building Dashcomigo as both a technology product and a mission-driven company

[Team to be expanded as investment is secured]

10. The Ask

We are seeking R\$[X] in pre-seed funding to:

Use of Funds	%	Purpose
Product Development	50%	Mobile app, AI layer, B2B API
Marketing & Growth	30%	Digital acquisition, partnerships
Operations	15%	Infrastructure, team, compliance
Legal & Regulatory	5%	LGPD compliance, data protection

Target: 10,000 paid users within 24 months of funding

11. Vision

In 10 years, Dashcomigo will be the financial backbone of the Brazilian self-employed economy.

We will be the platform that every Brazilian MEI uses every day — to understand their money, grow their business, invest their savings, and make better financial decisions.

We are not building a financial app.

We are building financial equity for Brazil's entrepreneurs.
