Product — Dashcomigo

What Is Dashcomigo?

Dashcomigo is a **web-based financial management platform** for Brazilian MEIs and small business owners. It centralizes all financial activity — transactions, cash flow, receivables, payables, investments — into a single, intelligent dashboard.

The platform connects directly to Brazilian bank accounts via **Open Finance (Pluggy)**, transforming raw bank data into actionable financial intelligence.

What It Does Today

1. Dashboard

The central command center. Shows at a glance:

- Current cash balance (real-time)
- Total receivables and payables
- Monthly income vs. expenses
- Open Finance connection status
- Alerts and smart notifications

2. Cash Flow Management

- Automatic import of bank transactions via Open Finance
- Manual transaction entry
- Automatic classification: income vs. expense, PF vs. PJ (personal vs. business)
- Monthly evolution chart
- Category breakdown

3. Accounts Payable

- Track bills, invoices, and obligations
- Status management: pending, paid, overdue
- Due date alerts
- Supplier tagging

4. Accounts Receivable

- Track client payments and expected income

- Overdue alerts
- Client-level receivables view

5. Investment Tracking (Open Finance)

- Real portfolio imported directly from banks via Open Finance
- Supports: Renda Fixa, Ações, ETFs, Fundos de Investimento, Previdência, FIs, COEs, Criptomoedas
- Portfolio summary: total invested, current value, absolute and % return
- Distribution by asset type
- CDI benchmark comparison
- For users without Open Finance: curated investment suggestions (Tesouro Direto, CDB, LCI/LCA, Fundos)

6. Financial Reports (PRO)

- Advanced financial reporting with:
 - Revenue vs. expense analysis over 3, 6, or 12 months
 - Monthly P&L table
 - Category breakdown charts
 - Expense trend analysis
 - Cash flow forecast (next 30 days)
 - **Investment analysis section** (portfolio vs CDI, asset allocation chart)
- Export to Excel (XLSX) and PDF

7. Client Management

- Client database
- Revenue attribution per client
- Client profitability view

8. Supplier Management

- Supplier registry
- Expense tracking by supplier

9. Proposals

- Create and send financial proposals
- Track proposal status

10. MEI Tax (DAS)

- DAS tax simulation and reminders
- Faturamento tracking vs. MEI limits

11. Simulators

- Financial scenario simulators for planning

What It Will Do — The Open Finance Vision

Open Finance is the infrastructure layer that transforms Dashcomigo from a manual tracking tool into an **automatic financial intelligence engine**.

Near Term (Active Development)

-  Bank connection via Pluggy widget
-  Automatic transaction import and classification
-  Investment portfolio import (real data from banks)
-  Periodic background sync (every 6 hours)
-  Multi-account aggregation (multiple banks, one view)
-  Smart deduplication across connections

Mid Term

-  Real-time alerts ("Your DAS is due in 5 days, and your cash position is R\$X")
-  Cash flow prediction based on recurring transaction patterns
-  Automatic PF/PJ expense separation
-  Investment recommendations based on available cash
-  Comparison: "Your portfolio vs. peers in similar revenue bracket"

Long Term

-  AI-powered financial advisor layer
-  Credit score simulation and loan eligibility
-  Integration with financial product marketplace (insurance, credit, investments)
-  Automated DAS filing assistance
-  Multi-entity management (for entrepreneurs with multiple businesses)

Technology Stack

Layer	Technology
Frontend	React + Vite + TypeScript + Tailwind CSS
Backend	Node.js + Express + TypeScript
Database	PocketBase (cloud-hosted)
Open Finance	Pluggy SDK (Brazil Open Finance)

Layer	Technology
Charts	Recharts
Auth	PocketBase Auth + Google OAuth
Payments	Stripe / Asaas
Hosting	Railway (backend + database)

Target User

Primary: Brazilian MEI (Microempreendedor Individual)

- Sole proprietors earning up to R\$81,000/year
- 15+ million registered in Brazil
- Typically manages finances via WhatsApp, spreadsheets, or not at all

Secondary: Small business owners (ME, EPP)

- 1–20 employees
- Need basic financial management without enterprise complexity

Tertiary: Freelancers and autonomous professionals

- Variable income, multiple clients
- Need to separate personal from professional finances
