# Product Roadmap — Dashcomigo

Last updated: Q2 2026

## Overview

| NOW                  | Q3 2026                           | Q1 2027               | 2028+                            |
|----------------------|-----------------------------------|-----------------------|----------------------------------|
| Foundation<br>(Live) | Intelligence<br>(In Progress)     | Platform<br>(Planned) | Ecosystem<br>(Vision)            |
| Core modules         | <span class="badge-done">✔</span> | Open Finance          | <span class="badge-wip">🔄</span> |
| Open Finance         | <span class="badge-done">✔</span> | Smart reports         | <span class="badge-wip">🔄</span> |
| Investments          | <span class="badge-done">✔</span> | Multi-bank            | <span class="badge-wip">🔄</span> |

## Phase 1 — Foundation (Completed)

Goal: A working product covering the core needs of a Brazilian MEI.

### Core Platform ✔

- User authentication (email + Google OAuth)
- Subscription plans (Free / PRO) with feature gating
- Dashboard with real-time financial overview
- Cash flow management (income and expenses)
- Accounts payable and receivable modules
- Client and supplier management
- Proposals module
- MEI DAS tax tracking and simulators

### Open Finance ✔

- Bank connection via Pluggy widget
- Transaction ingestion pipeline (normalize → classify → persist)
- PF/PJ automatic transaction classification
- Investment portfolio import (8 asset types)

- Background periodic sync every 6 hours
- Idempotent sync — no duplicate records

## Reporting

- Advanced financial reports (PRO plan)
  - Revenue vs. expense analysis (3/6/12 months)
  - Category breakdown, cash flow forecast
  - Investment analysis with CDI benchmark comparison
  - Portfolio evolution chart
  - Excel and PDF export
- 

## Phase 2 — Intelligence (Q3 2026, In Progress)

---

**Goal:** Make the platform smarter, more automatic, and more actionable.

### Open Finance Improvements

- Reliable multi-connection management (no duplicates across reconnects)
- Multi-bank aggregation (connect more than one institution)
- Webhook support for real-time transaction updates
- Improved PF/PJ classification with learning rules

### Smart Alerts

- Cash flow warning alerts ("Balance may go negative in 12 days")
- Overdue payment notifications (push + email)
- DAS due date reminders with available balance check
- Investment expiry alerts (CDB, LCI maturity)

### Reporting Enhancements

- Full P&L statement (DRE) by month
- Accounts receivable aging report
- Custom date range for all reports
- Comparison: current period vs. previous period
- Scheduled monthly report delivery via email

### Investment Module

- Historical performance tracking over time
- Asset-level return calculation
- Rebalancing suggestions based on target allocation
- Multi-benchmark comparison (CDI, IPCA, Ibovespa)

## Phase 3 — Platform (Q1 2027)

---

**Goal:** Scale into a comprehensive financial operating system.

### AI Insights Layer

- Natural language financial summaries
- Predictive cash flow (30/60/90 day projections)
- Anomaly detection on unusual expenses
- Personalized financial tips
- AI-assisted tax optimization suggestions

### Mobile Application

- iOS and Android native apps
- Push notifications for all alerts
- Biometric authentication

### B2B Features

- White-label version for accountants and financial advisors
- API for third-party integrations
- Multi-client management dashboard

### Platform Integrations

- NF-e (nota fiscal eletrônica) import
- Direct integration with MEI portal (gov.br)
- Accounting software connectors (Contabilizei, Omie)
- Marketplace integrations (Mercado Livre, Shopify)

---

## Phase 4 — Ecosystem (2028+)

---

**Goal:** Build the financial ecosystem around the Brazilian entrepreneur.

### Financial Product Marketplace

- Embedded credit offers based on revenue history
- Business insurance marketplace
- Investment product recommendations with execution

### AI Financial Advisor

- Conversational financial advisor (chat interface)
- Goal-based financial planning
- Retirement simulation for MEIs
- Business succession planning tools

## Success Metrics

| Phase   | Key Metric                 | Target             |
|---------|----------------------------|--------------------|
| Phase 1 | Monthly Active Users       | 500                |
| Phase 2 | Open Finance adoption rate | >60% of paid users |
| Phase 3 | Monthly Recurring Revenue  | R\$50K             |
| Phase 4 | Platform GMV               | R\$10M+            |
